DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-17 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly added limitation “---resulting in a spectral output of multiple frequencies spread over a broad spectral band during said altered 360 degree cycle,” in claims 1,9 and 12 is not supported by the specification as originally filed.

3. Examiner tried to find a fair interpretation of the claimed subject matter in specifications. Other than the added limitation in the claims and in the specification, there is no clear disclosure as to how the claimed invention result in a spectral output of multiple frequencies spread over a broad spectral band during said altered 360 degree cycle.

4. Examiner called and discussed with Applicant's representative Mr. Dennis L. Cook (Reg. #30,826) on April 13, 2006 for clarification of the above-mentioned limitation. Mr. Dennis said he will call back but did.

5. Claims 2-8,10,11 and 13-17 are inherently rejected as being dependent on the rejected base claims.
